

Job Description: MERN Stack Developer

Company: Veritech.ai

Position: MERN Stack Developer

Location: Remote

Experience Level: 2-4 years

About Veritech.ai

At Veritech.ai, we are building AI-driven solutions to transform industries and empower businesses with advanced technologies. Our focus is on creating innovative, scalable, and secure platforms that leverage AI to deliver insights and automation. We thrive on collaboration and pushing the boundaries of what's possible with technology.

Join Veritech.ai and be a part of a highly talented team where your ideas and skills will help shape the future of AI-driven applications.

Job Summary

We are seeking a talented MERN Stack Developer to join our growing development team. In this role, you will be responsible for designing, developing, and deploying full-stack web applications using MongoDB, Express.js, React, and Node.js (MERN stack). You will collaborate with data scientists, engineers, and other developers to build cutting-edge AI-driven solutions for our clients.

Key Responsibilities

- Develop and maintain scalable full-stack applications using the MERN stack.
- Collaborate with cross-functional teams to translate business requirements into efficient, well-designed, and responsive web applications.
- Design and develop RESTful APIs and integrate with backend services.
- Manage databases (MongoDB), ensuring data consistency, security, and performance.
- Work closely with the DevOps team to deploy applications in cloud environments, leveraging CI/CD pipelines.
- Conduct thorough testing, debugging, and optimization to ensure high performance and responsiveness.
- Stay updated on industry trends, technologies, and best practices, and implement them in the development process.
- Collaborate with data scientists to integrate AI models and algorithms into web applications.
- Ensure adherence to coding standards, best practices, and participate in code reviews.

Requirements

- 2-4 years of experience as a MERN Stack Developer.
- Proficiency in MongoDB, Express.js, React, and Node.js.
- Strong experience with API development and integration.
- Familiarity with modern frontend tools such as Redux, Webpack, and Babel.
- Strong understanding of version control systems like Git.
- Experience with cloud platforms such as AWS, Azure, or Google Cloud.
- Ability to write clean, well-documented, and efficient code.
- Familiarity with containerization technologies like Docker is a plus.
- Knowledge of web security and best practices for building secure applications.
- Excellent communication and collaboration skills, with a proactive attitude toward problem-solving.

Preferred Qualifications

- Experience with GraphQL and other API architectures.
- Knowledge of TypeScript.
- Experience with microservices architecture and distributed systems.
- Prior experience working in AI-driven or data-heavy applications.
- Familiarity with Agile development methodologies.
- AWS Cloud Practitioner Certified

What We Offer

- Competitive salary and comprehensive benefits.
- Flexible working hours and remote work options.
- A chance to work on cutting-edge AI technologies in a collaborative and innovative environment.
- Career growth and mentorship opportunities.
- An inclusive, forward-thinking culture where your contributions are valued.
